

Helvoet Hellevoetsluis is looking for:

Helvoet Rubber & Plastic Technologies is een moderne succesvolle onderneming op het gebied van klantspecifieke ontwikkeling en productie van eenvoudige en samengestelde kunststof- en rubbercomponenten. Helvoet heeft vestigingen en activiteiten in Nederland, België, Duitsland, Polen, India en de VS. De 120 werknemers van Helvoet-Hellevoetsluis zijn verantwoordelijk voor de engineering, productie en assemblage van kunststof- en rubberonderdelen voor de Automotive markt, Food – en Health Tech toepassingen en Industrial Control en dit voor klanten wereldwijd. Helvoet beschouwt haar medewerkers als belangrijk bedrijfskapitaal. Training en ontwikkeling van het personeel hebben een hoge prioriteit.

Lean Specialist QA

- Lean toolkit application skills (value stream mapping, 5S, Kaizen, Kanban, Error proofing, SMED, team problem solving, etc.)
- Multi-functional experience/ Broad perspective
- High communication skills with all levels of organization

Where will you be working?

As a part of Quality Department in Helvoet Hellevoetsluis you will realize structural improvements by inspiring and enabling people to solve cross-sector issues. You will lead cross-sector projects with impact on 5S, visual management, and work station design across all production and non-production departments.

What will you do?

- Contribute to further develop Lean culture in the organization;
- Identify improvement opportunities and implement changes using Lean concepts and tools;
- Develop the knowledge of all employees on Lean tools through training, communication and Kaizen;
- Monitor the action plans, record, track and follow up the Lean progresses;
- Maintain the process of planning, executing and action reviewing for 5S project.

Who are you?

- You are a highly effective self-employing communicator and problem solver with knowledge about Lean tools;
- You constantly look for opportunities to innovate, simplify, reduce waste, and increase efficiencies;
- You have strong interpersonal leadership skills to motivate others, manage change, and embed continuous improvement culture;
- Fluent in Dutch and English, both written and verbal;
- Knowledge of Excel, Minitab and 3D modeling will be appreciated;
- Knowledge of IATF 16949, ISO 9001 or ISO 13485 will be appreciated;
- HBO level or degree and experience in a similar role.

What do we offer:

In the role of Lean specialist, Helvoet offers a challenging function in a dynamic production environment. You will have a great opportunity to have influence on the process design to achieve the best results. It is a full-time position within friendly working environment with freedom for initiatives and personal development.

Are you interested in?

Please send your resume and short motivation to HR@helvoet.nl to the attention of Amber Roosekrans, HR Officer. For more information about the job position you can contact Arjen Pekaar, mail: apekaar@helvoet.nl.

Deze vacature is zowel intern als extern geplaatst. Bij gelijke geschiktheid genieten interne kandidaten de voorkeur.
