

Helvoet Hellevoetsluis is looking for:

Helvoet Rubber & Plastic Technologies is een moderne succesvolle onderneming op het gebied van klantspecifieke ontwikkeling en productie van eenvoudige en samengestelde kunststof- en rubbercomponenten. Helvoet heeft vestigingen en activiteiten in Nederland, België, Duitsland, Polen, India en de VS. De 120 werknemers van Helvoet-Hellevoetsluis zijn verantwoordelijk voor de engineering, productie en assemblage van kunststof- en rubberonderdelen voor de Automotive markt, Food – en Health Tech toepassingen en Industrial Control en dit voor klanten wereldwijd. Helvoet beschouwt haar medewerkers als belangrijk bedrijfskapitaal. Training en ontwikkeling van het personeel hebben een hoge prioriteit.

Quality Engineer Rubber department

- Knowledge of IATF 16949, ISO 9001, ISO 13485 standards
- Proficiency with 8D problem solving tools
- Proficiency of automotive core tools: FMEA; SPC, MSA, APQP, CP

Where will you be working?

As a Quality Engineer you are a member of the Quality Department in Helvoet Hellevoetsluis. This department is responsible for the quality activities in the production plant, including the supplier quality performance, engineering and for the promotion of quality awareness and continuous improvement throughout the organization.

What will you do?

- Identifying and resolving technical problems and developing quality standards;
- Work closely with suppliers, engineers and customers and understand their quality requirements;
- Manage and maintain Control Plans and FMEA;
- Implementation of corrective and preventive actions - coordinating 8D Reports;
- Lead quality, supplier, customer and 5S audits (internal & external).

Who are you?

- You are a self-starter, solution-oriented, analytical and have a hands-on mentality;
- You like to work in a highly motivated team and have strong administrative and technical skills;
- You constantly look for opportunities to increase quality, innovate, simplify, reduce waste, and increase efficiencies;
- You have strong knowledge of automotive core tools: Control Plan, FMEA, APQP, 8D;
- HBO level or degree in an engineering discipline;
- Experience within a quality role;
- Fluent in English both written and verbal. Polish is a plus.

What do we offer:

In the role of Quality Engineer, Helvoet offers a challenging job in a dynamic production environment. You will have a great opportunity to (further) deepen your knowledge in the area of automotive & medical standards and requirements. It is a full-time position within a friendly working environment with freedom for initiatives and personal development.

Are you interested?

Please send your resume and short motivation to HR@helvoet.nl to the attention of Amber Roosekrans, HR Officer. For more information about the job position you can contact Arjen Pekaar, mail: apekaar@helvoet.nl.

Deze vacature is zowel intern als extern geplaatst. Bij gelijke geschiktheid genieten interne kandidaten de voorkeur.
